## Complete Solutions for Industrial Valves

As one of the leading valve manufacturers in the world, Neway specializes in the development of innovative designs through intensive research and development programs along with a commitment to excellence and engineering in manufacturing valve solutions for all industries.

Neway's main product lines include gate, globe, check, butterfly, and ball valves with quality innovative designs that are recognized by many global users and EPCs. These products have been installed throughout the world in gas, oil, refining, chemical, and marine, power generation, and pipeline transmission industrial applications.

## Neway's Facilities

Neway's management structure is based on multi-plant manufacturing. We currently operate one R&D center, two valve assembly plants, and four specialized foundries in China. Our newest assembly plant was recently expanded in 2013, and it now covers nearly 35,000 square meters. Additionally, we have opened two overseas assembly plants in Mexico and Saudi Arabia.

Neway runs the most advanced manufacturing and management systems available. Our R&D software includes ANSYS, fe-safe, CF-Design, and SolidWorks. We are one of the few valve manufacturers performing Enterprise Resource Planning (ERP) using SAP ERP software in addition to utilizing automatic inventory management systems. Our in-house testing capabilities include fire-safe, cryogenic, high pressure gas and fugitive emission testing. These processes ensure that our products are safe, reliable, and environmentally-friendly.

Neway's goal is to occupy leading market positions through collaboration with value-adding business partners worldwide. In the last few years, Neway successively established new subsidiaries in Brazil, Dubai, Europe, Singapore, and the USA along with nearly 80 distributors around the world.

## Quality Assurance

Neway is dedicated to the pursuit of having zero defect valves leave our facility. We perform active Six Sigma quality management to continually enhance process control management based on advanced statistical data analysis. Neway's industrial certificates include ISO 9001, CEIPED, TA-Luft, API 6A, API 6D, ABS, API Q1 and Fire Safe approvals.

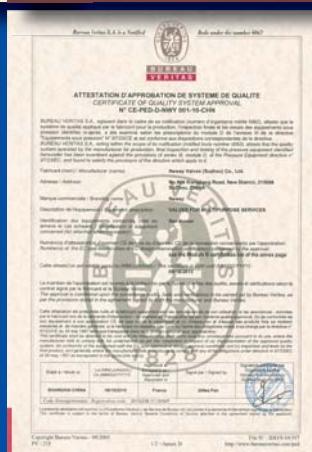

# Quality Commitment

ISO 9001

API 6D

API 6A

TA Luft

API 591

Fire Safe Test

Neway recognizes the important role a high quality valve plays in the safety and health of personnel as well as the protection of property. Neway concentrates its effort to provide customers with consistent products designed, manufactured, inspected, and tested in accordance with our customers' specifications at a competitive price in accordance with international standards.

CE/PED

Industry standards do not always consider all possible parameters when selecting valve products. Various decision making parameters such as special service fluids or external environments in which the valves operate are often not covered in standards and can negatively affect the valve's performance. Therefore, we recommend that our customers communicate with our engineering department about any specific question for their valve application. Using our experience in providing valves for various industries and media types, our valve optimization program continuously strives to provide valves that withstand deterioration in service and ensure proper valve selection that will remain operational during its intended commission lifetime.

8	F304L	8	F53	8	316+PTFE		

Note: Other materials are available upon request.

## Design Features

Industrial valves require wider temperature and pressure ranges that conventional butterfly valves can not achieve. This has driven the development of a high performance butterfly valve. Neway double offset series butterfly valves offer a light weight, compact, and cost effective design with the advantage of a low operating torque.

## Product Range:

**Size:** 2" - 48"

**Rating:** ANSI 150LB - 600LB

**Body Materials:** Carbon Steel, Stainless Steel, Alloy Steel, Duplex Steel

**Seat:** NBR, EPDM, VITON, PTFE, RPTFE

**End Connection:** Wafer, Lug, Double Flange

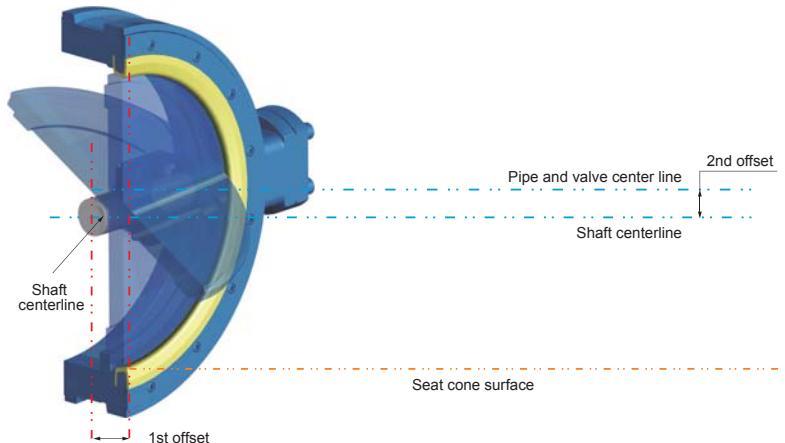

The double offset shaft and disc arrangement provides camming action to the disc which disengages from the seat with minimal rotation. This design minimizes the wear points at the top and bottom of the seat typically seen on conventional butterfly valves.

## Typical Applications:

- Petrochemical
- Refinery
- Offshore platform
- Power Plant
- LNG
- Steel Mills
- Commercial
- Pulp and Paper
- Hydrocarbon Process
- Industrial

# Double Offset Butterfly Valve

## Design Features

### Double Offset Frictionless Design

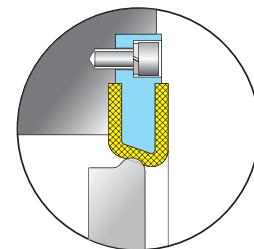

1<sup>st</sup> offset: Shaft is positioned downstream from the centerline of the seat.

2<sup>nd</sup> offset: Shaft is off center from the vertical axis of the seat.

## Seat Structure

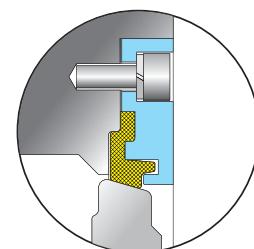

### 1. Double Offset Rubber Seat Butterfly Valve

The NBR seat is sulfured into the framework to improve sealing performance. The disc surface has a conical design to reduce the contact area and frictional force in order to extend the usage life. The valve seat can also be replaced or repaired easily

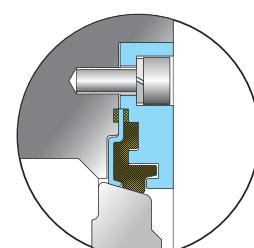

### 2. Double Offset PTFE Seat Butterfly Valve

A surplus of material between the PTFE Seat and Disc ensures a reliable seal in a low pressure environment. In high pressure situations, the force of the medium pushes against the seat contacting the sealing surface for a stronger seal. The disc surface has a conical design to reduce frictional force. The valve seat can also be replaced or repaired easily.

### 3. Double Offset Fire Safe PTFE Butterfly Valve

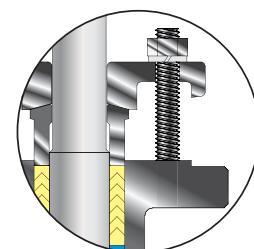

Fire Safe valve seat with dual seal includes a primary PTFE seat insert and metal seat. In the event that the PTFE insert is destroyed, the secondary metal seat provides an effective shut-off. The DOV fire safe certificate is approved by Lloyd's Register.

## Shaft Retention

Externally retained, double blowout proof stem design as API 609

External: Shaft is designed with an integral collar and gland follower to prevent blowouts.

## Zero Leakage

Disc-Seat sealing is achieved by evenly loading torque force onto the disc's laminated seal edge, and assures zero leakage in both hydrostatic and air tests per API 598.

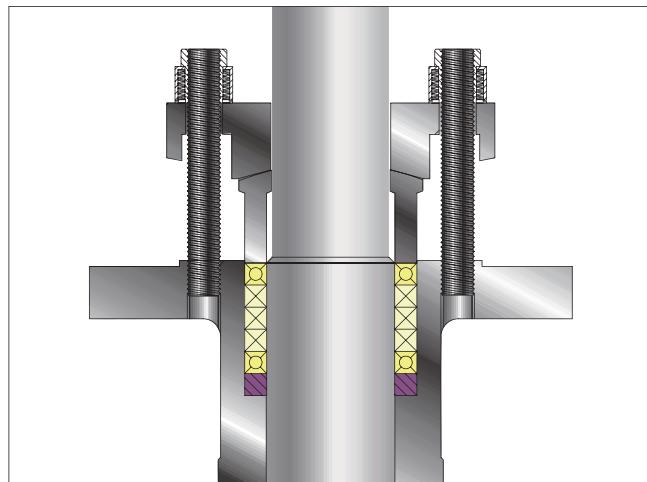

# Double Offset Butterfly Valve

## Design Features

### Low Emission Shaft Seal

Neway can supply packing that limits fugitive emission rates down to 20 ppm\*

- a.) The shaft is fully guided by a shaft bearing and gland follower to avoid any side load due to line pressure thrust.
- b.) The packing set is a pre-compressed combination of braided graphite rings and die formed flexible graphite rings.
- c.) The controlled Ra0.4-Ra0.8 finish of the shaft and Ra1.6 finish of the stuffing box result in optimum packing and shaft sealing performance.
- d.) Optional: Live Loaded gland flange is available to provide constant packing compression to reduce fugitive emissions.
- e.) Optional: Shaft seal designs are available per Shell MESC 77/312 & TA-Luft.

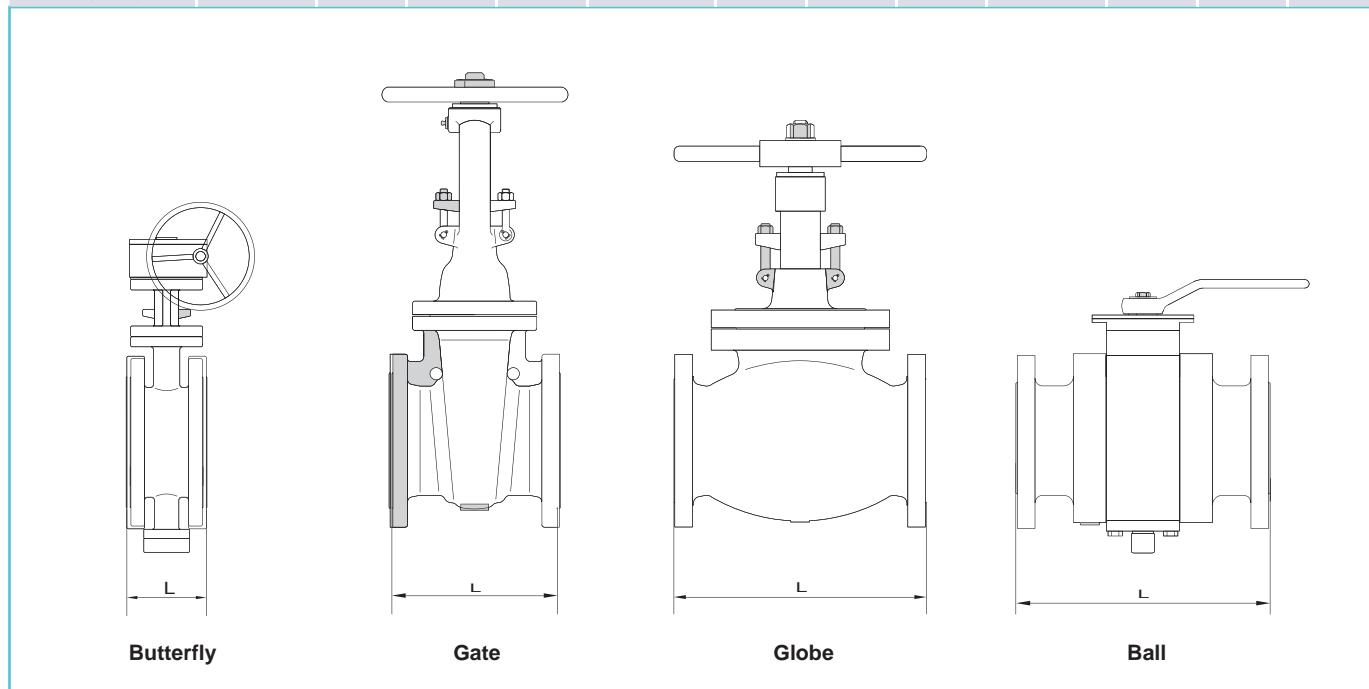

\*20 ppm per the ISO 15848 sniffing method with helium gas.

### Compact & Light Design

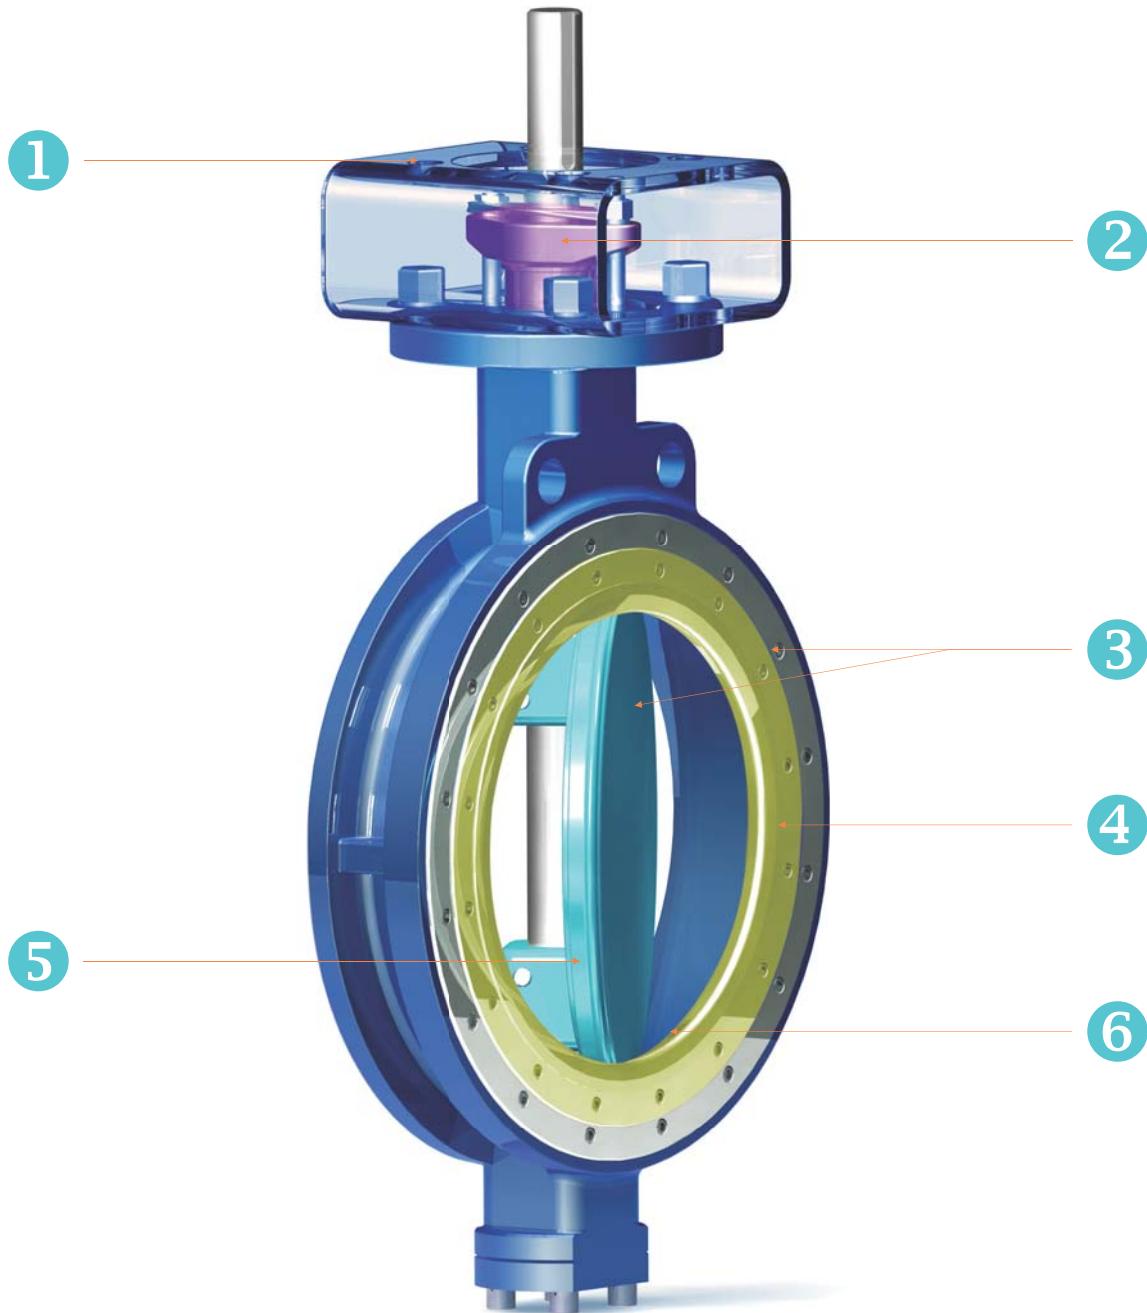

The Neway Double Offset Butterfly Valve is designed per API 609. Due to its compact and light design, it is an economical substitute for gate, globe, and ball valves. Below is a comparison table based on Neway 6" valve.

Class	150LB				300LB				600LB			
	Butterfly	Gate	Globe	Ball	Butterfly	Gate	Globe	Ball	Butterfly	Gate	Globe	Ball
Face to Face (mm)	140	267	406	394	140	403	445	403	210	559	559	559
Weight (kg)	21	77	100	190	34	144	168	211	87	234	284	248

# Double Offset Butterfly Valve

## Design Features

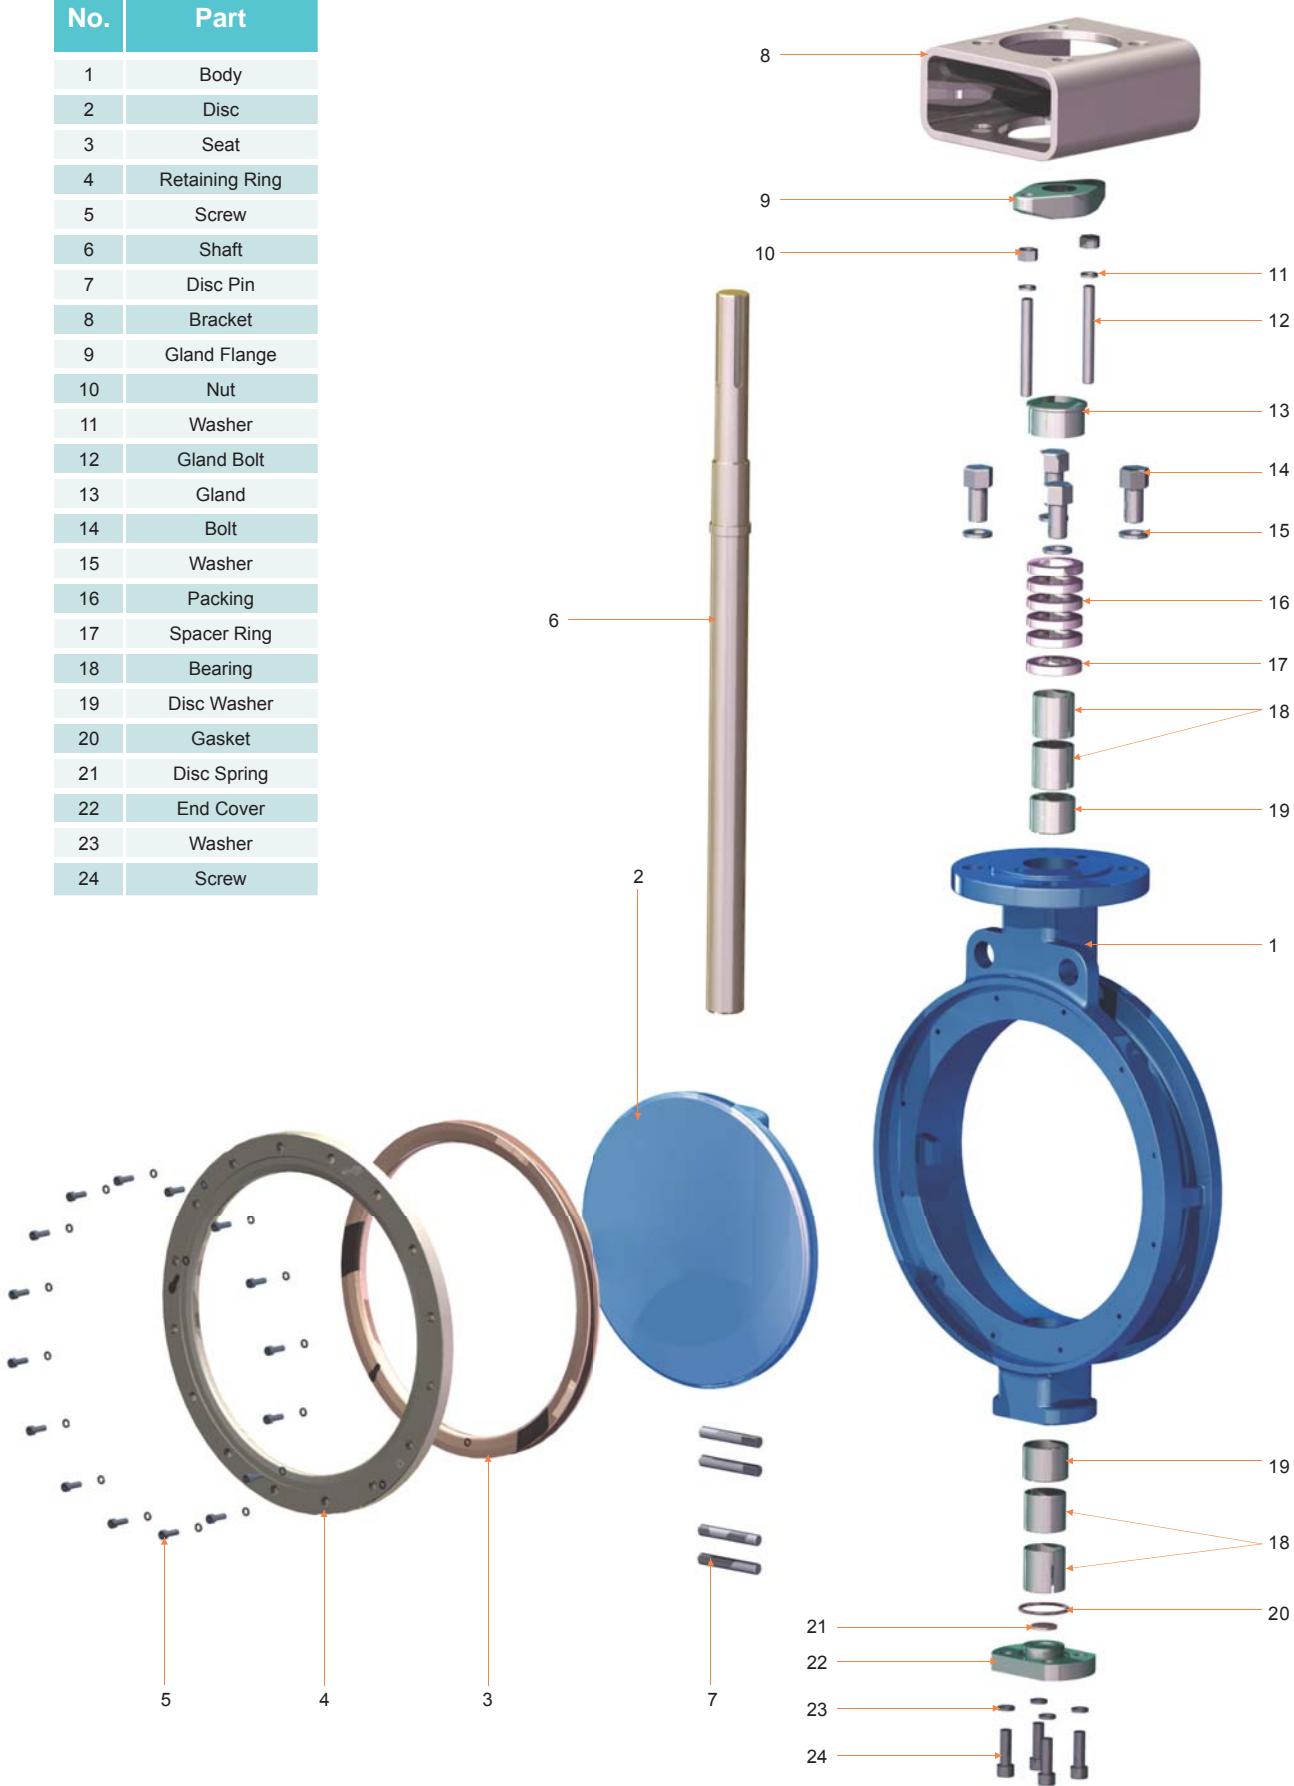

- ① ISO 5211 Top Flange
- ② In addition to standard, durable V-ring packing, you can also choose from optional graphite high temperature packing or emissions control packing.
- ③ Bi-Directional, Shut off performance
- ④ Seat Options: Rubber, PTFE, RPTFE, or Fire Safe PTFE
- ⑤ The double offset operating principle minimizes seat wear and lowers operating torque to improve durability.
- ⑥ Positive sealing is mechanically achieved and does not rely on line pressure assistance.

**Notes:**

- 1.) Definition:  
 $C_v$ : The volume of water in gpm at 15°C that will pass through a valve with a differential pressure of 1 PSI.  
 $K_v$ : The volume of water in m/hr at 15°C that will pass through a valve with a differential pressure of 1 bar.
- 2.)  $C_v = 1.155 K_v$

**Note:** 1. Torques shown are calculated at ambient temperature, a minimum safety factor of 1.2~1.5 is recommended for actuator sizing.  
 2. Torque for TBF series valve with NBR seat and shaft up stream at specified pressure.

## Pressure Temperature Ratings

Seat materials for Double Offset Butterfly Valve

The ratings above are for soft seal components. Please consult ASME b16.34 for Body and Disc Pressure/Temperature ratings.

# NEWAY Manufacturing Plants

## NEWAY Huashan Plant

Main Products: Ball Valve  
Covers area: 33,000 sqm  
Workshop: 21,000 sqm

Founded in 2003

## NEWAY Taishan Plant

Main Products: Gate Valve, Globe Valve, Check Valve, Forged Steel Valve, Butterfly Valve  
Covers area: 160,000 sqm  
Workshop: 92,000 sqm

Founded in 2006

## NEWAY Foundry (Suzhou)

Main Products: Sand Casting  
Covers area: 112,500 sqm  
Workshop: 98,000 sqm

Founded in 2008

## NEWAY Foundry (Suzhou)

Main Products: Sand Casting  
Covers area: 45,000 sqm  
Workshop: 25,000 sqm

Founded in 2003

## NEWAY Foundry (Dafeng)

Main Products: Lost wax investment casting  
Covers area: 46,000 sqm  
Workshop: 12,000 sqm

Founded in 2004

## NEWAY Foundry (Dafeng)

Main Products: Lost wax investment casting  
Covers area: 40,000 sqm  
Workshop: 20,000 sqm

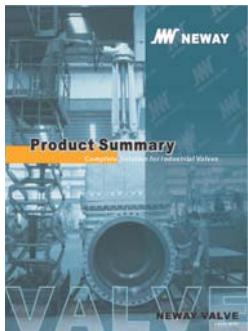

Founded in 2008

## Product Warranty

---

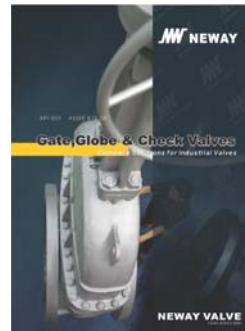

Seller will replace without charge or refund the purchase price of products which prove to be defective in material or workmanship; provided that the product is properly installed and is used in the service for which the Seller recommends it and that the written claim, specifying the alleged defect, is presented to the Seller within 18 months from the date of shipment or 12 months after installation, whichever occurs first. Seller shall in no event bear any labor, equipment, engineering or other costs incurred in connection with any repairs or replacement. The warranty stated in this paragraph is in lieu of all other warranties, either expressed or implied. With respect to warranties, this paragraph states the Buyer's exclusive remedy and seller's exclusive liability.
